DESCRIPTION OF INNOVATION

(Background of innovation / Trigger of ideas / Problem statement)

The walls in the living room lack the appropriate charm and objects or small items are often the miss places in the living room. we wanted to create a wall decoration product that functions as a small storage space. Therefore, we want to create this product because we want to help people from misplaced their belongings. For example they often miss place their valuable things such as remote televisions, keys, letters and others. That is why they often miss place them and are difficult to find. Honeycomb cabinet means a cabinet that conceptualizes the beehive pattern because the beehive pattern has an attractive and unique design. This honeycomb wall decoration was created to help users overcome the problem of carelessness in putting things in their proper place. In addition, this product can also be used as a wall decoration whether in the living room, dining room or bedroom. This is because, it is a bee-shaped design that makes the wall's jewelry look more attractive and unique when looking at it.
